

The "I Barely Know Her" Bot

"How do I run this bot? Well, I barely know it..."

To get started, install the requirements by running `pip install scrapetube youtube-transcript-api` in your CMD or Bash.

```
pip install scrapetube youtube-transcript-api  
python "do-you-know-her-?.py"
```

Once running, the bot scans transcripts and saves every potential joke it finds into a timestamped file within your folder.
